Candidate Name

manan@example.com

SUMMARY

Aspiring professional passionate about .

EXPERIENCE

Relevant Project/Experience
- Engineered a secure MERN web platform for 100+ users, implementing Google OAuth and JWT-based authentication, with potential for containerization using Docker for improved deployment and scalability.
- Designed an optimized MongoDB schema enabling <70ms real-time portfolio updates, with potential for visualizing key performance indicators and user engagement metrics using PowerBI.
- Visualized portfolio insights using Chart.js and Recharts (trendlines, P/L graphs, asset distribution), and explored advanced analytics and dashboard creation with PowerBI for deeper business intelligence.
- Developed a regression model ($R^2 = 0.91$) to predict crop yield using soil, rainfall, and climate-based environmental features, with potential for deploying the model as a Dockerized service for easy integration and scaling.
